C/O Mr. Tae Lee  
**Mee Industries Inc.**  
204 W. Pomona Avenue  
Monrovia CA. 91016

Bangkok, 01 February, 2006

Dear Mr. Lee,

We installed the Mee Fog Systems on two (2) units on Siemens V64.3 (62 MW/unit, ISO) in November 2002 and two (2) more on GE Frame 6561B in March 2003. The fog system was designed to provide 9.9 deg Celsius evaporative cooling and 0.6% overspray (Fog Intercooling).

We have been operating the Meefog systems on average 12 hrs. a day (six days a week) and all four (4) gas turbines have been operated reliably more than 20,000 running hours with Meefog without observe of any abnormalities.

Kind regards,

Reinhard Koedel  
Executive Vice President  
Amata Power Limited
