

MeeFog CloudMaker

What it does:

The MeeFog CloudMaker creates clouds made of pure water. There are no expensive chemicals to buy or residues to clean up. The CloudMaker can be used to enhance many environments and experiences by adding dynamic movement and visual effects. It can also be used for open air cooling in hot climates. Outdoor concerts, cafes, pool decks, Halloween displays, and special events can be enhanced with the CloudMaker.

This portable device puts the same technology trusted by businesses like Disney, Universal Studios, and Rainforest Cafe in your hands. Our proprietary stainless steel, high-pressure Mee nozzle creates billions of ultra-fine fog droplets that are 1/10th the diameter of a human hair. These droplets are the key to producing the industry's most consistent and professional fog. MeeFog has over 50 years of experience with designing fog installations for special effects. For beautiful fogging, use MeeFog and your imagination.

Features:

- Pure water fog.
- Small droplets with large cloud plume.
- 2,000 psi pump.
- Industrial quality.
- Plugs into any 120 volt wall outlet.
- Connects to standard garden hose.
